CHAGA MUSHROOM: Apty nicknamed as the "Diamond of the Forest" or the "Mushroom of Immortality", the Chaga mushroom is typically found on Birch trees in the colder regions of the world. While medical science has just now begun to shine a light on its astounding medicinal properties, it is, humans have been using the fungus as a healing agent for more than a millennia. The mushroom contains many anti-bacterial and anti-fungal properties. Not to mention, it's an exceptional source of antioxidants.

TURKEY TAIL: Commonly found in various parts of the world, the turkey tail mushroom is found growing on fallen trees, mainly in forests. The mushrooms can easily be identified thanks to their flat, circular shape, which may also resemble the unique and colorful tail of a turkey, hence the name.
